

### Designed For Your Lifestyle.

The Trevi® Collection of Roman shades by Tiger Window Fashions combine the soft look of traditional fabric-fold roman shades that stack smoothly and evenly when raised with the operating ease and convenience of modern operating systems.

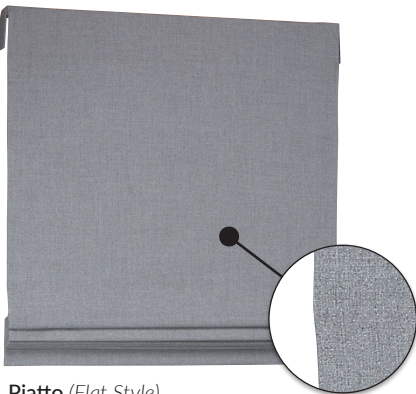

The Trevi® Collection of Roman Shades offers a wide array of unique fabrics and fabric styles, including silk, cotton and linen, different levels of light control, and when combined with our four shade styles, you can choose to bring an elegant, traditional look to your home or a more modern contemporary and relaxed appearance.

Control your shade with our standard child safe cordless operating systems or bead chain with available safety shroud. Also available is Automate™ motorization for hands free control with the app on your smart phone, connected tablet or smart home device.

Automate™ Advanced Motorization Technology Compatibility

Our standard Roman shades are pictured below and our New Bella Roman Shade is pictured to the right. The Bella shade fabric comes off the back of the headrail which reduces the gap between the window pane and the fabric when inside mounted. It also features a 6" valance with end returns when outside mounted. Bella is available in all our styles, Piatto, Inverso, Classico or Cascata with no additional cost for light filtering or blackout lining.

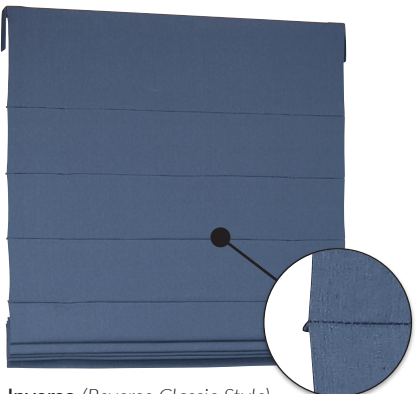

**Piatto (Flat Style)**

Flat Roman Shades are perfect for large, bold or striped patterns. The flat folds have no stitching that would interfere with the patterns and the result is a tailored look that is perfect for a clean modern profile.

**Classico (Classic Style)**

Ribs are rigid dowels that support the sharp folds and pleats of a Roman or Hobbled shade. These ribs are placed in a pocket on the shade.

**Inverso (Reverse Classic Style)**

Pockets on the back of the shade support rods and form attractive seams on the front of the shade. Binded Pleat shades are not recommended with fabrics that have a pattern. They work best with solid or textured fabrics.

**Cascata (Waterfull Style)**

Soft flowing traditional folds that ripple down the face of the shade are usually called waterfall or hobbled roman shades. The flowing into the next fold creates a rich fullness to the look. They are also known as looped or teardrop shades.

- Reduced gaps when inside mounted.
- Decorative 6" Valance.
- Valance end returns included when outside mounted.
